

Prairie Fuel Advisors Inc.

The AMM Fuel Supply Program continues to expand throughout the province and deliver worthwhile benefits to all participants. In 2005, the 67 AMM members of the Program purchased 5,600,000 litres of fuel and the other 150 members in Alberta and Saskatchewan purchased an additional 28,000,000 litres.

The Fuel Supply Program provides significant savings to members and is eliminating a lot of work for administrators who no longer have to tender fuel on their own and then monitor fuel prices on a regular basis. Given the volatility in fuel prices over the past year, the elimination of the challenge of trying to guess when to buy fuel is a big relief to all public works managers and administrators. All fuel prices under this program are fixed for a month at a time. Prices only change in response to changes in the underlying cost of fuel at the refinery. Those terms of our contract ensure that all AMM members in the program receive fair pricing at ALL times.

Local agents deliver the fuel and lubricants ordered by members. Most of them also support the AMM Fuel Supply Program, as they are paid a commission by their head office for handling the fuel but do not have to worry about purchasing fuel, pricing, collecting and all the paperwork they have to handle when they sell fuel on their own.

It is time to enter a new Fuel Supply Contract and AMM has prepared a new Request for Proposals (RFP) on behalf of all AMM Fuel Supply Program members and prospective members. It is being distributed to all interested fuel suppliers throughout the three Prairie Provinces, including all local dealers identified by our members.

In total for the three associations in Manitoba, Saskatchewan and Alberta, we have identified 42,000,000 litres of fuel required each year. An additional 19 members of AMM that purchase 2,700,000 litres of fuel annually have indicated that they will join the Program if they can save money on the cost of fuel.

If any other AMM members would like to have their fuel requirements included in the RFP, we can issue an Addendum to the document to include them. Please contact Linda Hargest at 204-856-2361.

DUST FREE ROAD MAINTENANCE

**DISTRIBUTOR OF INNOVATIVE MUNICIPAL PRODUCTS
OFFICIAL MTCML SUPPLIER**

Questions You Should Ask Your Dust Control Supplier:

- *Do you have a storage facility so as to provide uninterrupted service?*

We have increased our capacity by 500,000 litres to well over 1,000,000 litres total.

- *Do you carry liability insurance?*

We spend thousands of dollars per year to make sure our customers are protected.

- *Do you truck your own products?*

Yes we do, there-by maintaining professional drivers and taking full responsibility for our service.

If your supplier doesn't have the right answer, then you should be calling DUST FREE ROAD MAINTENANCE.

DUST FREE ROAD MAINTENANCE has the PRODUCT, the EQUIPMENT, and the EXPERTISE to take care of all your dust control needs.

SO... if you want all the RIGHT ANSWERS, call **JIM FREEDY AT 781-7677** today! DUST FREE ROAD MAINTENANCE is the company for you.

Dust Free Road Maintenance – Manitoba owned and operated

Official MTCML Supplier Dust Free Road Maintenance Inc. supplies Manitoba municipalities with *magnesium chloride*, the long-lasting solution to all gravel dust and road stabilization needs. As a division of Searcy Trucking, Dust Free Road Maintenance is 100% Manitoba owned and operated. It is committed to the parent's company motto of "Searcy Means Service."

Dust Free Road Maintenance is the exclusive distributor for Innovative Municipal Products. Currently, the company has in stock 500 bags of cold patch for asphalt road repair. The 50-lb bags are being 'blown out' at the wholesale price of \$9.95 per bag. For quantity pricing and free estimates for all your dust and road stabilization needs, call 204-781-7677 or fax 204-896-4290.

Michelin invests in Canada

Michelin North America recently announced a \$92 million investment to install production for its X One® single wide truck tires at its Waterville, NS plant. The expansion doubles Michelin's X One tire capacity.

The X One is a revolution in truck tire design delivering significant fuel and weight savings to trucking fleets. Michelin X One tires replace dual tires with a single wide tire. When used in both drive and trailer positions, X One tires can save users 4 to 10% in fuel costs and increase payloads from 800 to 1,300 pounds.

Whether the application is long haul or regional, low profile 22.5", standard 22.5" or low profile 24.5", Michelin has you covered. Two drive tires, two trailer tires and one all-position tire have all been sized to simply replace a set of duals with no gearing change required.

The Michelin X One casing architecture introduces the first zero degree circumferential belt in a production truck tire – the Infini-Coil™. Combined with a radial ply, three additional working belts and a full-width protector ply belt, the six-ply package helps provide exceptional vehicle handling and stability. Thanks to Infini-Coil technology, casing growth is minimized and tread contact is maximized, resulting in a great ride.

Contact your local Michelin dealer for more information on this revolutionary tire.

Goodyear.
Supplier to the Association
of Manitoba Municipalities

- Complete line of tires and retreads
- 24-Hour Commercial Road Service
