

Cybersecurity Audit Service

Association of Manitoba Municipalities (AMM)

Overview

- ▶ Why get a Cybersecurity Audit?
 - To identify, estimate, and prioritize your organization's risk to operations, assets, individuals, and other organizations
 - To maintain confidentiality and prevent unauthorized access
 - To identify required actions to strengthen your organization's Cybersecurity posture
 - To ensure alignment with your organization's goals

Overview

- ▶ Bloom's approach to address Cybersecurity concerns:
 - Specifically, Microsoft 365 or Platform-agnostic
 - Facilitate identifying and understanding the security risks from a series of interview sessions
 - Assist with proper planning and preparedness to keep your organization safe
 - Deliver standard security assessment around the scope of:
 - User accounts
 - Content storage and protection
 - Awareness of Cybersecurity and assessment of training plans
 - Cybersecurity policies

Benefits

The Bloom Cybersecurity Audit provides you with:

- ▶ Understanding of your risks
- ▶ A clear plan, tailored to your organization
- ▶ Complete flexibility in how and when you address your risks

Delivery

▶ Current State Assessment (4 Pillars):

1. **Identity:** a review of how user accounts are created, secured, and kept secure
2. **Data:** a review of where and how content is stored, identified, and protected
3. **Training/Awareness:** an assessment of the training plans and overall awareness of cybersecurity best practices for end users
4. **Policy:** a review of organizational cybersecurity policies vs standard policies

Delivery

▶ Review and Recommendations:

1. Documented observations and recommendations made with a clear remediation path\
2. Walkthrough explanation of each recommendation
3. Consulting review with the AMM to make informed decisions
