2022 AMM District Director By-Elections

Given the results of the general municipal election, nominations are now open to fill eight (8) vacant positions on the AMM Board of Directors from seven (7) Districts.

Vacant positions:

- Northern District (2 positions) – 1 position from The Pas, Flin Flon, Snow Lake or Grand Rapids; 1 position from Thompson, Lynn Lake, Leaf Rapids, Churchill, Gillam or LGD of Mystery Lake
- Parkland District (1 position)
- Midwestern District (1 position)
- Central District (1 position)
- Western District (1 position)
- Eastern District (1 position)
- Interlake District (1 position)

All elections will be conducted virtually on **Tuesday, November 29, 2022** via Zoom

The 4th reminder (Member Advisory) with the links will be sent on Monday, November 28, 2022

Visit [AMM District by Elections Page](#) to learn more.

Manitoba Household Hazardous Waste Stewardship Program Plan

Product Care Association will be holding public consultations for the renewal of the Manitoba Household Hazardous Waste Stewardship Program Plan (2023 – 2028).

The Manitoba Household Hazardous Waste Stewardship Program is the approved product stewardship program for residential paint, fluorescent lights (including Industrial, Commercial and Institutional), flammable liquids/gasoline, corrosives, toxics, physically hazardous materials and pesticides, managed and operated by Product Care pursuant to the [Manitoba Household Hazardous Material and Prescribed Material Stewardship Regulation](#). The current [Manitoba Household Hazardous Waste Stewardship Program Plan](#), which expires on June 31, 2023, was developed by PCA and [approved](#) by the **Manitoba Ministry of Environment and Climate Change Strategy**.

A copy of the proposed Program Plan is available for download here [Proposed Manitoba Household Hazardous Waste Program Plan - Product Care Recycling](#)

You are invited to participate in the consultations on the new proposed plan. A webinar for stakeholders will be held on:

Date: November 28, 2022

Time: 2pm – 3pm CST

https://us06web.zoom.us/webinar/register/WN_6mexKzaKQs-ACB0MvSJXTg

A further public webinar will be held on **December 2, 2022, at 2pm CST**. For more details on how to join the public webinar please [CLICK HERE](#)

MEIA Emerging Issues - Cleantech Conference

The banner features a teal background with a white geometric logo on the left. The text '2022 MEIA Emerging Issues Cleantech Conference' is prominently displayed in white. Below this, the tagline 'CLEAN TECHNOLOGY: PATHWAYS TO NET ZERO' is written in a smaller font. On the right, the date and time 'November 30, 2022 8:00 AM - 6:30 PM' and the location 'RBC Convention Centre 375 York Ave, Winnipeg, MB' are listed. A row of five circular portraits shows the speakers: Dr. David Suzuki, Jane McDonald, Steve Patterson, Heidi Cook, and a Trio from Indian City. Below each portrait is their name and role. At the bottom, a teal bar contains the text 'Registration Now Open | Sponsorship Levels Available' and the website 'www.MEIAemergingissues.ca'. A QR code is located in the bottom right corner.

Transport Canada's Rail Safety Improvement Program New Funding Stream

Transport Canada's Rail Safety Improvement Program (RSIP) provides federal funding in the form of grants or contributions to help improve rail safety, contribute to increasing safety at grade crossings and along rail lines, address climate change resilience, and increase public confidence in Canada's rail transportation system.

RSIP is launching a new **Climate Change and Adaptation to Extreme Weather Infrastructure** funding stream to support projects that:

- Support vulnerable rail infrastructure projects by ensuring resilience to extreme weather events and adaptation to climate change; and
- Address climate change resilience through the rehabilitation, mitigation, and/or prevention of the impacts of climate change/extreme weather along rail lines and rail property.

Examples of potential projects include: implementing erosion correction/control methods to repair damage from a flood and mitigate future damage, removing debris from tracks/rail crossings/rail property following an extreme weather event, installing soil stabilization measures such as dykes or retaining walls to reduce erosion, and implementing ecosystem-based approaches using natural infrastructure (e.g., planting trees) to design adaptation measures.

We will be holding an information session soon to provide an overview of relevant program information and answer questions on the program/application process. Please watch for an email in your inbox for registration details.

****Associations please note – we ask that you distribute this message as widely as possible throughout your membership and stakeholders to raise awareness about the new Climate Change and Adaptation to Extreme Weather Infrastructure funding program.**

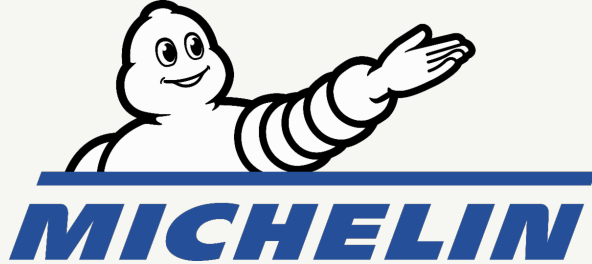

For more information about this funding opportunity, please visit the [website](#). **The deadline to apply is January 6, 2023 (12:00pm PST)**
