Just released:

Heart & Stroke 2017 Report on the Health of Canadians

This year's report reveals the harmful effects of marketing unhealthy food and beverages to Canadian kids.

Today's kids are bombarded with food and beverage marketing morning, noon and night, every day of the week. This is having a devastating effect on their health.

We now have kids who have spent their whole lives eating unhealthy diets high in processed foods. Unhealthy eating is a leading risk for death in Canada, starting in childhood and building through life.

In short, the food and beverage industry is marketing our children and youth to death.

Please help raise awareness and educate Canadians about the dangers of marketing unhealthy food and beverages to kids by taking the following steps:

1. READ the 2017 Report entitled [The kids are not alright](#).
2. SHARE with your social media networks on [Facebook](#) and [Twitter](#).
3. ACT - please see page 14 of the report for specific actions **municipal governments** can take.
