Cybersecurity Audit Service

Cybersecurity is increasingly important, and the cost/impact of a cybersecurity incident continues to rise. A cybersecurity assessment allows organizations to identify areas where they are weakest, and provides a clear roadmap to addressing the risks and gaps that could be exploited and cause a significant issue.

AMM has negotiated an agreement with [Bloom Software Co.](#) to offer cybersecurity audits to AMM municipal members.

Bloom's assessment model addresses the key areas that are of greatest concern, discusses and defines them in plain language, and provides organizations the ability to make informed decisions about their own priorities to set an implementation plan.
