1.0 RESEARCH METHODOLOGY AND BACKGROUND

This province-wide Omnibus survey was designed and conducted by Probe Research via telephone interviews taken between September 15th and October 6th, 2008 among a random and representative sampling of 1,000 adults residing in Manitoba.

With a sample of 1,000 one can say with 95 percent certainty that the results are within \pm 3.1 percentage points of what they would have been if the entire adult population of Manitoba had been interviewed. The margin of error is higher within each of the survey's population sub-groups.

Modified random digit dialing was used to ensure that all Manitoba adults would have an equal opportunity to participate in this Probe Research Inc. survey. Minor statistical weighting has been applied to this sample to ensure that age and gender characteristics properly reflect known attributes of the Manitoba population. All data analysis was performed using SPSS statistical analysis software.

2.0 RESEARCH RESULTS

2.1 **Priority for Infrastructure Renewal**

Manitobans were asked to rate the level of priority they feel municipal governments in Manitoba should assign to infrastructure renewal projects.

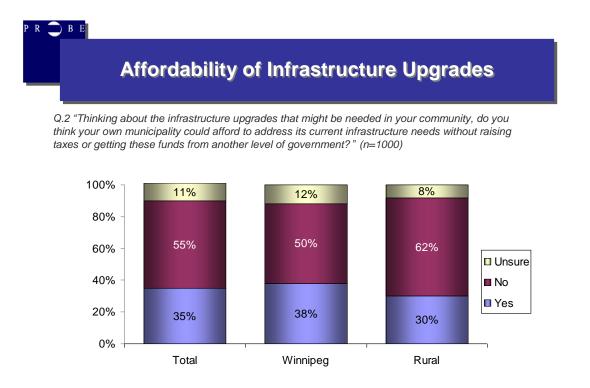

Clearly, the vast majority of Manitobans feel that municipalities in the province should be giving priority to infrastructure renewal projects, including 27 who feel this should receive the "highest" priority and 67 percent who say these type of projects should receive "high priority" from municipalities.

This critical level of priority was offered by all respondents, regardless of location or sociodemographic background.

2.2 Budget for Infrastructure Upgrades

A majority of Manitobans do not feel their own municipal government could afford to pay for infrastructure upgrades without raising taxes or looking to other levels of government for financial support.

^{- %} of All Respondents -

Only just better than one-third of Manitobans (35%) felt that their municipality could pay for its own infrastructure needs without turning to other sources for this revenue. Meanwhile more than one-half of surveyed citizens (55%) were convinced that their municipality could not afford to cover these projects.

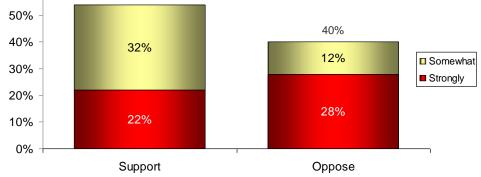

Regionally, 38 percent of respondents from Winnipeg felt the city could afford to pay for needed infrastructure projects without raising taxes or obtaining funds from the provincial or federal governments, compared to only 30 percent of those living in the rest of the province.

Young Manitobans were far more likely than older citizens to feel their municipality could pay for infrastructure projects without looking elsewhere for funds (42% 18-34 years versus 28% aged 55+), as did those with some post-secondary education and with small children at home (43% each).

2.3 Support for Dedicated Sales Tax

A slim majority of Manitobans would support a one percent municipal sales tax to pay for infrastructure renewal projects.

Fifty-four percent of Manitobans (including 22% "strongly" support) report they would support the idea of an additional one percent municipal tax dedicated exclusively for infrastructure renewal projects. Conversely, forty percent opposed this idea (including 28% "strongly" oppose).

Strongest proponents of this tax included:

- Manitobans aged 18-34 years (63%)
- Middle-income respondents (63% \$30K-\$59K)

SECTION AMM 1. In your opinion, how much priority do you think should be given by minicipal governments in Manitoba to infrastructure renewal projects? 2. Thinking about the infrastructure upgrades that might be needed in your community, do you think your own municipality could afford to address its current infrastructure needs without raising taxes or getting these funds from another level of government?

SECTION AMM

In your opinion, how much priority do you think should be given by minicipal governments in Manitoba to infrastructure renewal projects? Thinking about the infrastructure upgrades that might be needed in your community, do you think your own municipality could afford to address its current infrastructure needs without raising taxes or getting these funds from another level of government?
