for

## Eastern District Director

June 16, 2023

I was elected as Councillor in the Town of Ste Anne in October 2022 with a goal to increase commercial development and services to residents to meet the needs of a growing population. With this in mind, I volunteered to revive the Community Development Corporation (CDC) and have recruited motivated individuals to dedicate time to the Board of the CDC and begin the process of planning for increased and targeted economic and social development.

I believe all municipalities in our region should be working together to increase the services and opportunities for our residents to live, work, and play locally. I have lived and worked in communities of various sizes in Manitoba including, Woodlands, Dauphin, Winnipeg, and Ste Anne which has given me perspective on the needs and challenges of different communities.

I am a Certified Professional Accountant (CPA, CGA) working in the public sector and can use my knowledge and experience to support the municipal budgeting process and discussions involving project development and approval. I have also owned my own retail business, worked in the tourism and hospitality industries, and delivered training to many groups of people.

I have been a volunteer for many organizations that I believe in; CDC town of Ste Anne, Vortex Water Polo, Keystone Rainbow Curling League, St Mary's Road United Church, Scouts Canada, CGA Manitoba, Dauphin Chamber of Commerce, CPA Manitoba, United Way Charitable Workplace Campaign, and Positive Space Initiative.

Together with my partner Gerry, we have 5 children ranging in age from 14-21. I believe it is our duty to work for increased opportunities for them and their peers to work locally and to have the opportunities to thrive in their different career and family paths. We need to ensure that the services they need are in our communities and therefore we must partner with medical organizations to attract and retain medical professionals in our region.

I am committed to continue to build networks and open communication between organizations in order to ensure that our communities can thrive and deliver opportunities and services to all our residents.
